NEWEST SCANNER ON THE MARKET

We have recently added a new scanner to our portfolio: the Go!SCAN SPARK™ from Creaform. With this new device now we give you:

- Four times better resolution
- Three times faster scanning
- Two times more accurate

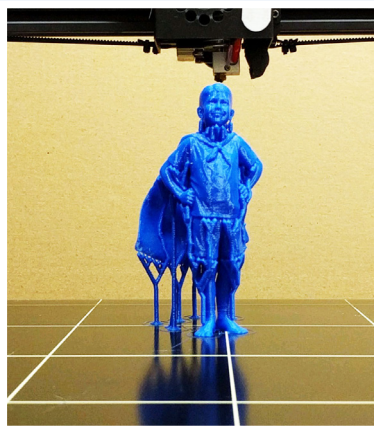

35 YEARS OF EXPERIENCE.

As part of the Adonis Bronze group, with over 35 years in the art business, we know that attention to detail is a must. With our State-of-the-Art scanners, we can ensure that the digital model will capture the true spirit of your creation.

Fallen Veterans Memorial, Ben Hammond.

Time to Save the World, Scott Streadbeck.

Immigrants, by Erasmo Fuentes.

We understand how important your project is to you. We will take the time to thoroughly understand your project, your time restraints, and budget.

OUR MAIN SERVICES.

3D Scanning.

At Adonis3D, we have the know-how to help you pick the right scanner for the right job. Whether you are in the office, or on the job site, 3D scanning is an amazing way to accurately and affordably streamline your work-flow.

3D Printing.

The 3D printers at Adonis 3D generate precision and functional prototypes, master patterns, for tooling and real end-use parts. They can be used to optimize designs, streamline work-flows, and bring innovative products.

Foam Enlargement.

State-of-the-art laser scanning equipment at Adonis 3D converts high detail scans into code. With this code, foam enlargements can be carved using the 5 Axis CNC router creating a fast, lightweight, and efficient way of enlarging a model.

Digital Sculpting.

The range of modeling services provided is broad and offers viable solutions for all challenging requirements. Seasoned designers and in-house artists make sculpted designs accurately take shape as designed and envisioned by our clients.
